20 Amp Circuits (Conservative approach: no more than 7 outlets per circuit)

Using Rule of Thumb: 80% of a 20-amp circuit is 16-amps or 1920 watts on a 120V system, to comply with that restriction, should have a limit of ten receptacles on a 20 amp circuit (16 amps ÷ 1.5-amp = 10.67 devices).

The house wiring supply system (panels) are only a guess on my part. I will need the advice of an Electrician. I simply put these in to convey that I would like to have a back up Generator System (Generac), with in-ground Propane tank, and a Solar Power system. These can be installed at a later time if not within budget but should be wired for future.

Perspective overview showing locations of electrical and items drawing from panel. Assuming at least a 400 Amp service from city.

Tankless Water Heater is an option but requires (3) 50 Amp circuits. Other option is a traditional electric water heater.

I am not opposed to more electrical outlets.

JOSEPH C GRASSO

SCALE:

SHEET:

A-45

Two 200 Amp Panels. Not sure what the City provides if more is needed. For instance, Tankless Water Heater I was contemplating requires (3) 50 amp circuits. That would commit 150 Amps from a 200 Amp panel not leaving room for much else. I will need guidance from an electrician on this.

Propane Back-up Generator system if within budget, but wired for future addition if not within budget now.

Future intent is to also put Solar Panel system. If within budget, install with construction, if not, wired for future installation.

Shelving next to panels facilitates Batteries for solar system.

Modeled after a friends build.

He had two 200 Amp panels, a separate sub-panel tied into mains for generator, with only essentials powered in emergencies. I can provide a video of his setup and explanation if needed.

A single duplex outlet located in each room throughout house had usb ports. These usb/duplex outlets identified the emergency power outlets when active. Otherwise functioned as normal.

Open to your expertise here, so whatever design you feel necessary. Add more outlets as you see fit for water heater, R/O softener system, etc.

PEX Hub for plumbing.

Specifications

- Double bowl
- Users: 1-2
- Culinary/Wash Tools included: Nine
- Galley Taps recommended: Two
- Outside dimensions: 57 1/2" x 19 1/2" x 10 5/16"
- Countertop cutout: 56 1/2" x 18"
- Basin area: 33 7/8", 21 7/8" x 16"
- Minimum cabinet size: 60" or 150cm

Basin (KSO-5-D-SS)

- 16GA 316L stainless steel indoor/outdoor
- SilentArmor™ sound reduction technology
- Angel finish
- Two tier design
- Star™ groove pattern
- Reversible side drain
- Drain covers included
- Limited Lifetime Warranty
- Made in the USA
- ASME A112.19.3/CSA B45.4 certified

Tap Hole Specifications

SUGGESTED GALLEY TAP AND TAP ACCESSORIES PLACEMENT GUIDE

(Recommendations are based on installing 3 or more Tap accessories)

Suggested maximum inside corner radius of countertop cutout 3/8"

- ① Galley Tap 1 3/8" min hole diameter (1 1/2" min hole diameter for fast water jet cut)
- ② ⑤ Galley Soap Dispenser 1" min to 1 3/8" max hole diameter
- ③ ④ Galley Deck Switch 1 3/8" min hole diameter or Galley Automatic Strainer Basket knob 1" min and 1 3/8" max hole diameter
- ④ Galley Hot & Cold Tap 1 3/8" min hole diameter (1 1/2" min hole diameter for fast water jet cut)

Center Tap hole diameters 2" behind cutout

Note: Galley Hot & Cold Tap requires a minimum 8" clearance to center if installed to the right of the Galley Tap

Note: For installation where the drain is on the left side, simply reverse placements of Tap and Tap Accessories

Electrical Requirements	102 A
Hose Length	No more than 12' (3.7 m)
Voltz/Hertz/Amps	115 V, 60 Hz, 15 or 20 amp circuit
Shipping Weight	119 lb (54 kg)

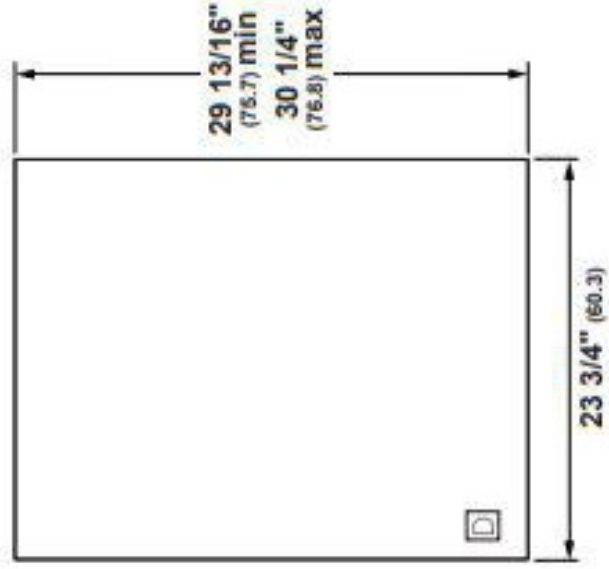

Dimensions in parentheses are in centimeters unless otherwise noted.
 Actual product dimensions may vary due to manufacturing tolerances.

Electrical supply: 115V 60Hz 20 Amp Circuit

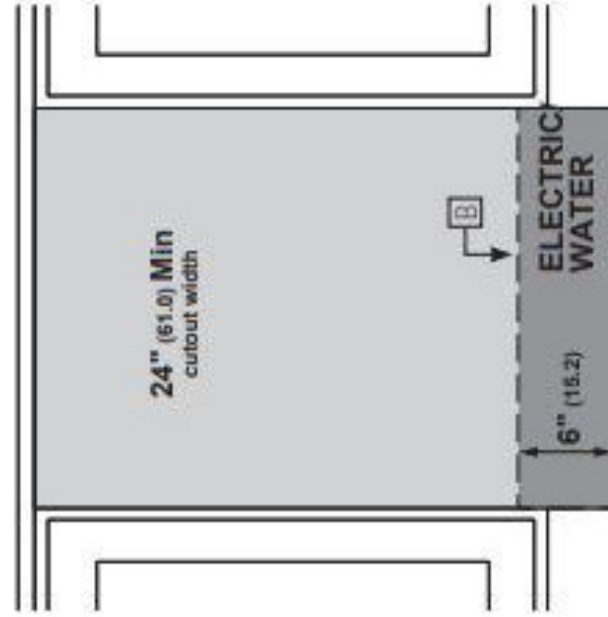

FLUSH CUTOUT INSTALLATION

CUSTOM PANEL

INSTALLATION CUTOUT FRONT VIEW

NOTES

- A** The dishwasher drain hose must be no more than 12 feet in length for proper drainage.
- B** Electrical connections are at the right front of the dishwasher and water connections are on the left. The hot water line should extend forward 30" to 40" from the rear wall. The electrical must extend forward at least 24" to reach the junction box.
- C** To prevent siphoning, an air gap or high drain loop must be used.
- D** A custom panel installation template (Part No. WD35X25996) is available from GE Parts and Accessories (US 800.626.2002, Canada 800.561.3344).

For more details, refer to the installation instructions for this product on Monogram.com. Dimensions in parentheses are in centimeters unless otherwise noted.

SPECIAL NOTES

- The custom panel and custom handle of your choice should be secured to the dishwasher before installation begins. A template with instructions and installation hardware is provided.
- For planning purposes, you may order the template in advance by calling 1.800.GE.CARES (1.800.423.2737) or by visiting our website at GEAppliances.com in the United States.
- In Canada, call 1.800.561.3344 or visit www.GEAppliances.ca. Order Part No. WD35X25996. Complete panel installation instructions are included on the template.
- Maximum panel weight is 20 LBS (9.1 kg).

Design Guide - Stainless Steel Installation

THE INSTALLATION SPACE

*The finished cutout width must be:
 35-1/2" (90.17 cm) for 36" models
 41-1/2" (105.41 cm) for 42" models
 47-1/2" (120.65 cm) for 48" models

Water And Electrical Locations

The opening must be prepared with the electrical and the cold water supply located as shown.

The Cutout Depth Must Be 24" (60.96 cm)

The refrigerator will project forward, slightly beyond adjacent cabinetry for standard installation.

Additional Specifications

- A 115 volt 60Hz., 15 or 20 amp power supply is required. An individual properly grounded branch circuit or circuit breaker is recommended. Install a properly grounded 3-prong electrical receptacle recessed into the back wall. Electrical must be located on the rear wall as shown.
- The water line can enter the opening through the floor or back wall. The water line should be 1/4" O.D. copper tubing or SmartConnect™ kit between the cold water line and water connection location, long enough to extend to the front of the refrigerator. Installation of an easily accessible shut-off valve in the water line is required.

- A 115 volt 60Hz., 15 or 20 amp power supply is required. An individual properly grounded branch circuit or circuit breaker is recommended. Install a properly grounded 3-prong electrical receptacle recessed into the back wall.

- Water line can enter the opening through the floor or back wall. Route SmartConnect™ kit or 1/4" O.D. copper tubing between the cold water line and the water connection location. The tubing should be long enough to extend to the front of the refrigerator. Installation of an easily accessible shut-off valve in the water line is required.

Design Guide - Stainless Steel Installation

DIMENSIONS AND CLEARANCES

* Shipping height. The refrigerator can be adjusted to fit into a cutout that is 84-1/2" (214.63 cm) in height. Use leveling legs and wheels for a maximum 1" (2.54 cm) (height) adjustment.

Depth Including Handles:

- 27-7/8" Stainless Steel Models with optional Minimalist Handle (ZKSS2H2CNSS)
- 28 3/8" Stainless Steel Models with optional Statement Handles (ZKSS2H2PNSS)

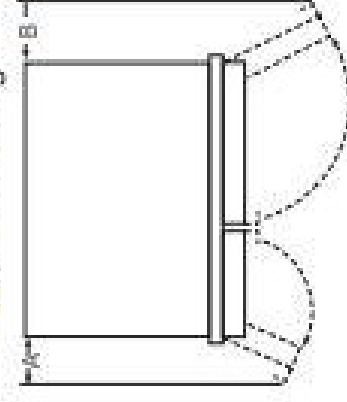

Product Clearances

These refrigerators are equipped with a 3-position door stop. The factory-set 115° door swing can be adjusted to 90° if clearance to adjacent cabinets or walls is restricted. Only standard installation can be adjusted to 130°

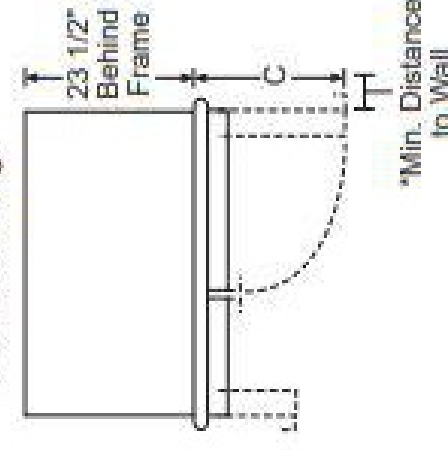

Allow minimum clearances for the freezer door (Dimension A) and fresh food door (Dimension B) for a full 115° door swing and to allow for pan removal. For a 90° door swing, allow 4 5/8" (11.75 cm) min. clearance to a wall, for framed and stainless steel models. If the 90° door stop position is used, pan access is maintained, but pan removal is restricted.

See the illustrations on pages 29 and 30 to determine door swing interaction with adjacent cabinets or countertops.

STANDARD INSTALLATION

FLUSH INSTALLATION

HELPFUL TIPS

- A** Junction box location (May also be located in adjacent cabinet.)
- B** To reduce the risk of tipping of the drawer, the Anti-Tip block must be properly installed located 14-13/16" above the floor on which the Microwave Drawer will sit. The Anti-Tip block must be provided and pre-installed by the purchaser of the product or builder before install can be done. The Anti-Tip block prevents serious injury that might result from spilled hot liquids.
- C** Cleats may be visible and should be finished to match cabinetry.
- D** The face of the shelf must sit 1-7/8" back from the face of the cabinet. See installation instructions for further details including the installation of 24" flush mount deflector vent.

Double doors width can be widened to standard dimensions as necessary. No need for custom sized doors

Note to self: This is automatically modified with plan changes in Master Bedroom Dimensions Layer Set

Note to self: This is automatically modified with plan changes in Master Bedroom Ceiling Layer Set

Ceiling effect I am looking to achieve. The dimensions on the previous page were altered when I re-adjusted the walls from ICF to Block. Rather than spend time on it I will let you work it out. The original dimensions were a 2 ft wide base with a stair stepped 1 ft wide lower section. The design in the center was a 2'x2' square with 1' wide lead-ins. It was pretty simple with even numbers. Software inadvertently changed things. The design was from the ceiling down, not up into attic.
